SAHIL PATIL

Computer Science & Engineering | Software Developer | Java

9322152320 sahilpatil222005@gmail.com LinkedIn GitHub CodeChef LeetCode Kolhapur, India

PROFESSIONAL SUMMARY

Computer Science and Engineering student with an 8.02 CGPA and strong foundation in Core Java, OOP, DSA, SQL, and full-stack development. Hands-on experience with Java, React.js, Node.js, and MongoDB. Solved 500+ CodeChef and 175+ LeetCode problems, with a strong interest in Java Full Stack Development and software engineering.

EDUCATION

D.Y. Patil College of Engineering & Technology | Kolhapur — 2023 - 2027
B.Tech – Computer Science & Engineering — *CGPA : 8.02*

Kisanrao More Highschool & Junior College | Saravde — 2022 - 2023
Class XII — *Percentage : 72.17%*

PROJECTS

StartupSync — AI-Powered Recommendation System | Github — Jun 2026 - Present

- Leading a team developing an AI-powered platform connecting startups with relevant investors, mentors, students, and opportunities.
- Developed a recommendation engine for generating relevant profile-based recommendations.
- Evaluated Top-5 recommendation similarity and contributed to integrating the recommendation engine with the backend.

Technologies / Tools Used : *Python, Scikit-learn, TF-IDF, Cosine Similarity, React.js, Node.js, Express.js, MongoDB, GitHub*

DYPConnect — College Professional Networking Platform | Github — Jul 2026 - Present

- Developing a professional networking platform connecting students, faculty, and alumni with profiles, connections, opportunities, search, and notifications.
- Developing REST APIs and backend services with secure user authentication and database integration.
- Implementing user profiles, networking features, search functionality, and personalized recommendation features.

Technologies / Tools Used : *React.js, JavaScript, Node.js, Express.js, MongoDB, Mongoose, JWT, Git, GitHub*

E-Grampanchayat Management System — Jan 2026 - May 2026

- Built an Android application for managing citizen records and local administrative services.
- Implemented modules for complaints, announcements, certificates, events, emergency alerts, and village information.
- Designed a user-friendly interface for accessing and managing administrative services.

Technologies / Tools Used : *Android, Java, XML, SQLite*

SKILLS

Programming Languages :	Java, Python, C, C++, Go, C#
Web & Backend :	HTML, CSS, JavaScript, React.js, Node.js, Express.js, Flask, REST APIs
Databases :	SQLite, MySQL, MongoDB
Core Concepts :	Data Structures & Algorithms, OOP, DBMS, SQL
Tools & Platforms :	Git, GitHub, IntelliJ IDEA, Android Studio
Currently Learning :	Spring Boot, Hibernate/JPA, Advanced Java, Backend Development

AWARDS & ACHIEVEMENTS

- Solved 500+ programming problems on CodeChef, strengthening Data Structures & Algorithms and competitive programming skills.
- Solved 175+ problems on LeetCode and earned the 100 Days Coding Badge.
- Contributed to an open-source GitHub repository through a successfully merged pull request.

CERTIFICATIONS

- Cisco : Introduction to Cybersecurity
- Udemy : Java Programming for Complete Beginners
- Eduskill : Java Full Stack
